

Project Demo Planning

Date	6 July 2026
Team ID	XXXXXX
Project Name	OptiCrop – AI-Based Crop Recommendation System
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the OptiCrop – AI-Based Crop Recommendation System is presented effectively by demonstrating all major features in a clear and systematic manner. This document outlines the complete project demonstration plan.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the OptiCrop project, objectives.	2	Tondaladinne Farnaz
2	Solution Overview	Explain the system architecture, technologies used.	3	Tondaladinne Farnaz
3	Live Loan Prediction Demo	Demonstrate the web application by entering soil.	5	Tondaladinne Farnaz
4	Machine Learning & Backend	Explain data preprocessing, model training, feature scaling, Flask backend, and prediction process.	3	Tondaladinne Farnaz
5	Deployment Demonstration	Demonstrate the live application hosted on Render.	2	Tondaladinne Farnaz
6	Conclusion	Summarize the project, discuss its benefits.	2	Tondaladinne Farnaz

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the challenges farmers face in selecting suitable crops based on soil nutrients.
2	Solution Overview	Describe the system architecture, technologies used, Machine Learning workflow, and dataset.
3	Live Feature Demonstration	Show the crop recommendation process using the live OptiCrop web application by entering sample values.
4	Q&A Session	Answer questions from the faculty and explain the implementation, model selection.
